IL5RA Rabbit pAb

DATASHEET -

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

GenelD: 3568 SWISS: Q01344

Target: IL5RA

Immunogen: KLH conjugated synthetic peptide derived from human IL-5R

alpha: 11-110/420. < Extracellular >

Purification: affinity purified by Protein A

Concentration: 1mg/ml

Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50%

Glycerol.

Shipped at 4°C. Store at -20°C for one year. Avoid repeated

freeze/thaw cycles.

Background: The protein encoded by this gene is an interleukin 5 specific subunit of a heterodimeric cytokine receptor. The receptor is comprised of a ligand specific alpha subunit and a signal transducing beta subunit shared by the receptors for interleukin 3(IL3), colony stimulating factor 2 (CSF2/GM-CSF), and interleukin 5(IL5). The binding of this protein to IL5 depends on the beta subunit. The beta subunit is activated by the ligand binding, and is required for the biological activities of IL5. This protein has been found to interact with syndecan binding protein (syntenin), which is required for IL5 mediated activation of the transcription factor SOX4. Six alternatively spliced transcript variants encoding three distinct isoforms have been reported.

Applications: WB (1:500-2000)

Reactivity: Human, Mouse

(predicted: Rat, Rabbit,

Cow)

Predicted 46 kDa MW.:

Subcellular Location: Cell membrane

VALIDATION IMAGES

Sample: testis (mouse) Lysate at 40 ug lung (mouse) Lysate at 40 ug ovary (mouse) Lysate at 40 ug A549 (human)cell Lysate at 40 ug Primary: Anti- IL5RA(bs-2061R)at 1/300 dilution Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution Predicted band size: 46kD Observed band size: 56 kD
