DATASHEET -

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

GenelD: 10595 **SWISS:** 075460

Target: IRE1a (Ser 726)

Immunogen: KLH conjugated synthesised phosphopeptide derived from human

IRE1a around the phosphorylation site of Ser726: SF(p-S)RR.

Purification: affinity purified by Protein A

Concentration: 1mg/ml

Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50%

Glycerol.

Shipped at 4°C. Store at -20°C for one year. Avoid repeated

freeze/thaw cycles.

Background: ERN2, endoplasmic reticulum to nucleus signaling 2, induces

translational repression through 28S ribosomal RNA cleavage in response to ER stress. It is pro-apoptotic and appears to play no role in the unfolded-protein response, unlike closely related

proteins.

Applications: IHC-P (1:100-500)

IHC-F (1:100-500) IF (1:100-500) Flow-Cyt (1ug/test)

Reactivity: Human, Rat

(predicted: Mouse, Rabbit, Pig, Cow, Dog, Horse)

Predicted MW . 107 kDa

MW.: 107 KDa

Subcellular Location: Cell membrane ,Cytoplasm

VALIDATION IMAGES

Paraformaldehyde-fixed, paraffin embedded (rat brain tissue); Antigen retrieval by boiling in sodium citrate buffer (pH6.0) for 15min; Block endogenous peroxidase by 3% hydrogen peroxide for 20 minutes; Blocking buffer (normal goat serum) at 37°C for 30min; Antibody incubation with (IRE1a (Ser 726)) Polyclonal Antibody, Unconjugated (bs-4308R) at 1:400 overnight at 4°C, followed by operating according to SP Kit(Rabbit) (sp-0023) instructions and DAB staining.

Blank control: Raji. Primary Antibody (green line): Rabbit Anti-phospho-IRE1a (Ser 726) antibody (bs-4308R) Dilution: 1ug /10^6 cells: Isotype Control Antibody (orange line): Rabbit IgG . Secondary Antibody: Goat anti-rabbit IgG-PE Dilution: 1µg /test. Protocol The cells were fixed with 4% PFA (10min at room temperature) and then permeabilized with PBST for 20 min at room temperature. The cells were then incubated in 5%BSA to block non-specific protein-protein interactions for 30 min at at room temperature .Cells stained with Primary Antibody for 30 min at room temperature. The secondary antibody used for 40 min at room temperature. Acquisition of 20,000 events was performed.
