300-362/362.

**Purification:** affinity purified by Protein A

Concentration: 1mg/ml

**Background:** This gene encodes a member of the G-protein coupled receptor

family. Although this protein was earlier thought to be a receptor for vasoactive intestinal peptide (VIP), it is now considered to be an orphan receptor, in that its endogenous ligand has not been

identified. The protein is also a coreceptor for human

immunodeficiency viruses (HIV). Translocations involving this gene and HMGA2 on chromosome 12 have been observed in lipomas.
