
Somatostatin Receptor 2 Rabbit pAb

Catalog Number: bs-10986R

Target Protein: Somatostatin Receptor 2

Concentration: 1mg/ml

Form: Liquid

Host: Rabbit

Clonality: Polyclonal

Isotype: IgG

Applications: WB (1:500-2000), IHC-P (1:100-500), IHC-F (1:100-500), IF (1:100-500), ELISA (1:5000-10000)

Reactivity: Human (predicted: Mouse, Rat, Rabbit, Pig, Cow, Dog, Guinea Pig, Horse)

Predicted MW: 41 kDa

Entrez Gene: 6752

Swiss Prot: P30874

Source: KLH conjugated synthetic peptide derived from human Somatostatin Receptor 2:
51-150/369.

Purification: affinity purified by Protein A

Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.

Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.

Background: Somatostatin is a tetradecapeptide that is widely distributed in the body and is one of five receptor subtypes termed SSTR1-. These receptors function in the regulation of numerous physiological processes such as the secretion of insulin, glucagon and growth hormone as well as cell growth induced by neuronal excitation in both the central and peripheral nervous systems. Somatostatin receptors are activated via somatostatin secreted by nerve and endocrine cells. Somatostatin Receptor 2 (SSR2), along with SSR1, is expressed at the highest levels in the stomach and jejunum, cerebrum and kidney, respectively.
