bs-12110R

[Primary Antibody]

P2RX6 Rabbit pAb

techsupport@bioss.com.cn

400-901-9800 - DATASHEET -Host: Rabbit Isotype: IgG Applications: WB (1:500-2000) Clonality: Polyclonal Reactivity: Mouse (predicted: Human, GenelD: 9127 SWISS: 015547 Rat, Rabbit, Pig, Dog, Horse) Target: P2RX6 Predicted 49 kDa Immunogen: KLH conjugated synthetic peptide derived from human P2RX6: 55-160/441. < Extracellular > MW.: Purification: affinity purified by Protein A Subcellular Location: Cell membrane Concentration: 1mg/ml Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: The P2X receptor family is comprised of ligand-gated ion channels that allow for the increased permeability of calcium into the cell in response to extracellular ATP. The seven P2X receptors, P2X1-P2X7, form either homomeric or heteromeric channels or both. They are characterized by intracellular amino- and carboxy-termini. P2X receptors are expressed in a wide variety of tissues, including neurons, prostate, bladder, pancreas, colon, testis and ovary. The major function of the P2X receptors is to mediate synaptic transmissions between neurons and to other tissues via the binding of extracellular ATP, which acts as a neurotransmitter. The P2X receptors may be involved in the onset of necrosis or apoptosis after prolonged exposure to high concentrations of extracellular ATP.
