— DATASHEET —

Host: Rabbit

Isotype: IgG

Clonality: Polyclonal

Target: HGV Polyprotein

Immunogen: KLH conjugated synthetic peptide derived from Hepatitis G Virus Polyprotein: 2401-2500/2842.

Purification: affinity purified by Protein A

Concentration: 1mg/ml

Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.
Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.

Background: Hepatitis G virus is from a group of viruses called GB viruses (GB virus A, GB virus B and GB virus C) and is also designated as GB virus C (GBV C). HGV is a positive stranded RNA virus, with a genome of 10 KB and appears, on the basis of genome length and organisation, to be a member of the Flaviviridae and distinct from the hepatitis C virus (HCV). HGV infection appears to be transmitted following receipt of blood from HGV RNA positive donors, however, these patients have only moderate liver enzyme elevations and do not develop chronic liver disease.

Applications: **IHC-P** (1:100-500)

IHC-F (1:100-500)

IF (1:100-500)

ELISA (1:5000-10000)

Reactivity: (predicted: Hepatitis virus)

Predicted MW.: 307 kDa
