Background: This gene encodes a member of the natural killer cell receptor C-

type lectin family. The encoded protein inhibits osteoclast formation and contains a transmembrane domain near the N-terminus as well as the C-type lectin-like extracellular domain. Several alternatively spliced transcript variants have been identified, but the full-length nature of every transcript has not

been defined.

Applications: Flow-Cyt (1µg/test)

Rat, Rabbit, Pig, Dog, Horse)

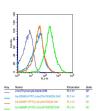

Predicted 10

MW.: ^{10 kDa}

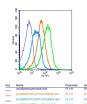

Subcellular Extracellular matrix, Cell

Location: membrane
