产品介绍: Mitoxantrone is an anthraquinone that intercalates in DNA and inhibits topoisomerase II (IC₅₀ = 5.3 μM), thus inhibiting cell proliferation. It also inhibits HIV-1 integrase (IC₅₀ = 3.8 μM). Mitoxantrone is exported from cells in an ATP- and glutathione-dependent manner by multidrug resistance protein-1.4 Formulations containing mitoxantrone have been used in the treatment of cancer and multiple sclerosis.
