产品介绍: Defactinib, also known as VS-6063 and PF-04554878, is an orally bioavailable, small-

molecule focal adhesion kinase (FAK) inhibitor with potential antiangiogenic and antineoplastic activities. FAK inhibitor PF-04554878 inhibits FAK, which may prevent the integrin-mediated activation of several downstream signal transduction pathways,

including ERK, JNK/MAPK and PI3K/Akt, thus inhibiting tumor cell migration, proliferation

and survival.
