
Abametapir

产品编号: D51669

CAS: 1762-34-1

分子式: C₁₂H₁₂N₂

纯度: ≥98%

InChi: InChI=1S/C₁₂H₁₂N₂/c1-9-3-5-11(13-7-9)12-6-4-10(2)8-14-12/h3-8H,1-2H3

InChi Key: PTRATZCAGVBFIQ-UHFFFAOYSA-N

Smiles: CC1=CN=C(C=C1)C1C=CC(C)=CN=1

外观: 固体粉末

作用通路: MMP

溶解性: Soluble in DMSO, not in water

保存条件: Store in dry, dark place for one year.

产品介绍: Abametapir is the active ingredient of Xeglyze Lotion. Abametapir inhibits metalloproteinases; enzymes that are essential to physiological processes critical for egg development and the survival of nymph and adult lice. In vitro and ex vivo research has demonstrated that abametapir not only kills the lice, but also prevents hatching of their eggs. Xeglyze Lotion is emerging as a differentiated development candidate to treat head lice infestations.
