— DATASHEET —

Host: Rabbit Clonality: Polyclonal GeneID: 1103 Target: ChAT Immunogen: KLH conjugated synthetic peptide derived from human ChAT: 101-200/748. Purification: affinity purified by Protein A Concentration: 1mg/ml Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: This gene encodes an enzyme which catalyzes the biosynthesis of the neurotransmitter acetylcholine. This gene product is a characteristic feature of cholinergic neurons, and changes in these neurons may explain some of the symptoms of Alzheimer's disease. Polymorphisms in this gene have been associated with Alzheimer's disease and mild cognitive impairment. Mutations in this gene are associated with congenital myasthenic syndrome associated with episodic apnea. Multiple transcript variants encoding different isoforms have been found for this gene, and some of these variants have been shown to encode more than one isoform. [provided by RefSeq, May 2010].	Isotype: IgG SWISS: P28329	Applications: WB (1:500-2000) Flow-Cyt (1 μ g/Test) Reactivity: Human Predicted MW.: 82 kDa Subcellular Location: Cytoplasm ,Nucleus

Sample: Lane 1: Human SH-SY5Y cell lysates
 Lane 2: Human U251 cell lysates Primary: Anti-ChAT (bs-0042R) at 1/1000 dilution Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution Predicted band size: 82 kDa Observed band size: 72 kDa

Blank control: SH-SY5Y. Primary Antibody (green line): Rabbit Anti-ChAT antibody (bs-0042R) Dilution: 1 μ g / 10⁶ cells; Isotype Control Antibody (orange line): Rabbit IgG . Secondary Antibody : Goat anti-rabbit IgG-AF647 Dilution: 1 μ g /test. Protocol The cells were fixed with 4% PFA (10min at room temperature) and then permeabilized with 90% ice-cold methanol for 20 min at -20°C. The cells were then incubated in 5% BSA to block non-specific protein-protein interactions for 30 min at room temperature .Cells stained with Primary Antibody for 30 min at room temperature. The secondary antibody used for 40 min at room temperature. Acquisition of 20,000 events was performed.
