DRD2 Mouse mAb**— DATASHEET —**

Host: Mouse Clonality: Monoclonal GeneID: 1813 Target: DRD2 Purification: affinity purified by Protein A Concentration: 1mg/ml Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: This gene encodes the D2 subtype of the dopamine receptor. This G-protein coupled receptor inhibits adenylyl cyclase activity. A missense mutation in this gene causes myoclonus dystonia; other mutations have been associated with schizophrenia. Alternative splicing of this gene results in two transcript variants encoding different isoforms. A third variant has been described, but it has not been determined whether this form is normal or due to aberrant splicing. [provided by RefSeq, Jul 2008]	Isotype: IgG SWISS: P14416	Applications: WB (1:100-1000) Reactivity: (predicted: Mouse, Rat) Predicted MW.: 51 kDa Subcellular Location: Cell membrane ,Cytoplasm
