phospho-p63 (Ser160+Ser162) Rabbit pAb

DATASHEET -

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

GenelD: 8626 SWISS: Q9H3D4

Target: p63 (Ser160+Ser162)

Immunogen: KLH conjugated Synthesised phosphopeptide derived from human

p63 around the phosphorylation site of Ser160/Ser162: AL(p-S)P(p-

S)PA.

Purification: affinity purified by Protein A

Concentration: 1mg/ml

Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50%

Glycerol.

Shipped at 4°C. Store at -20°C for one year. Avoid repeated

freeze/thaw cycles.

[provided by RefSeq, Jul 2008].

Background: This gene encodes a member of the p53 family of transcription

factors. An animal model, p63 -/- mice, has been useful in defining the role this protein plays in the development and maintenance of

stratified epithelial tissues. p63 -/- mice have several

developmental defects which include the lack of limbs and other tissues, such as teeth and mammary glands, which develop as a result of interactions between mesenchyme and epithelium. Mutations in this gene are associated with ectodermal dysplasia, and cleft lip/palate syndrome 3 (EEC3); split-hand/foot malformation 4 (SHFM4); ankyloblepharon-ectodermal defects-cleft lip/palate; ADULT syndrome (acro-dermato-ungual-lacrimal-

tooth); limb-mammary syndrome (acro-dermato-ungual-lacrimal-tooth); limb-mammary syndrome; Rap-Hodgkin syndrome (RHS); and orofacial cleft 8. Both alternative splicing and the use of alternative promoters results in multiple transcript variants encoding different proteins. Many transcripts encoding different proteins have been reported but the biological validity and the full-length nature of these variants have not been determined.

Applications: Flow-Cyt (1ug/Test)

ELISA (1:5000-10000)

Reactivity: Human (predicted: Mouse,

Rat, Pig, Sheep, Chicken,

Dog, Horse)

Predicted MW.: 77 kDa

Subcellular Nucleus
