bs-7594R

[Primary Antibody]

Ankyrin-1 Rabbit pAb

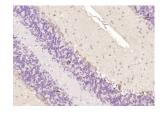

www.bioss.com.cn sales@bioss.com.cn techsupport@bioss.com.cn 400-901-9800

- DATASHEET			400-901-9800
Host: Ra		Isotype: IgG	Applications: IHC-P (1:
Clonality: Po	olyclonal	-	IHC-F (1: IF (1:100-
GenelD: 28	6	SWISS: P16157	, ,
Target: Ar	ıkyrin-1		Reactivity: Mouse (p Rat, Pig, (
	.H conjugated synthetic pep ythroid: 501-600/1881.	tide derived from human Ankyrin	, ,
Purification: affinity purified by Protein A			Predicted MW.: ^{206 kDa}
Concentration: 1r	ng/ml		MW.: 200 ND4
Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.			Subcellular Location: ^{Cell mem}
pr ro cc Mi ta re sti st Ar er	oteins to the underlying spe les in activities such as cell r ontact and the maintenance ultiple isoforms of ankyrin w rget proteins are expressed i gulated manner. Most ankyr ructural domains: an amino- ultiple ankyrin repeats; a cen bectrin binding domain; and omain which is the least consi- nkyrin 1, the prototype of thi ythrocytes, but since has als	ns that link the integral membrane ctrin-actin cytoskeleton and play key notility, activation, proliferation, of specialized membrane domains. ith different affinities for various in a tissue-specific, developmentally rins are typically composed of three terminal domain containing ntral region with a highly conserved a carboxy-terminal regulatory served and subject to variation. s family, was first discovered in the to been found in brain and muscles. rrin 1 have been associated in	

approximately half of all patients with hereditary spherocytosis. Complex patterns of alternative splicing in the regulatory domain, giving rise to different isoforms of ankyrin 1 have been described. Truncated muscle-specific isoforms of ankyrin1 resulting from usage of an alternate promoter have also been identified.

VALIDATION IMAGES

Paraformaldehyde-fixed, paraffin embedded (mouse cerebellum); Antigen retrieval by boiling in sodium citrate buffer (pH6.0) for 15min; Block endogenous peroxidase by 3% hydrogen peroxide for 20 minutes; Blocking buffer (normal goat serum) at 37°C for 30min; Antibody incubation with (Ankyrin erythroid) Polyclonal Antibody, Unconjugated (bs-7594R) at 1:200 overnight at 4°C, followed by operating according to SP Kit(Rabbit) (sp-0023) instructionsand DAB staining.
