— DATASHEET —

Host: Rabbit Clonality: Polyclonal GeneID: 79180 Target: EFHD2 Immunogen: KLH conjugated synthetic peptide derived from human EFHD2: 51-150/240. Purification: affinity purified by Protein A Concentration: 1mg/ml Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: EFHD2 is a 240 amino acid protein that regulates spontaneous apoptosis through the regulation of Bcl-xS abundance. Localized to membrane raft, Swiprosin-1 is expressed in lymphocytes and contains two EF-hand domains. The gene encoding Swiprosin-1 maps to human chromosome 1, which spans 260 million base pairs, contains over 3,000 genes and comprises nearly 8% of the human genome. Chromosome 1 houses a large number of disease-associated genes, including those that are involved in familial adenomatous polyposis, Stickler syndrome, Parkinson's disease, Gaucher disease, schizophrenia and Usher syndrome. Aberrations in chromosome 1 are found in a variety of cancers, including head and neck cancer, malignant melanoma and multiple myeloma.	Isotype: IgG SWISS: Q96C19	Applications: WB (1:500-2000) Reactivity: Mouse (predicted: Human, Rat, Pig, Sheep, Cow) Predicted MW.: 27 kDa Subcellular Location: Cell membrane
