dependent amino long chain base su palmitoyltransfer oxosphinganine w in sphingolipid bio in patients with ho Alternatively splic been identified. P	s a member of the class-II pyridoxal-phospha transferase family. The encoded protein is th ubunit 1 of serine palmitoyltransferase. Serin ase converts L-serine and palmitoyl-CoA to 3 vith pyridoxal 5'-phosphate and is the key en osynthesis. Mutations in this gene were ident ereditary sensory neuropathy type 1. ed variants encoding different isoforms have seudogenes of this gene have been defined o 5, 10, and 13.
