— DATASHEET —

Host: Rabbit Clonality: Polyclonal GeneID: 55184 Target: DZANK1 Immunogen: KLH conjugated synthetic peptide derived from human DZANK1: 21-120/752. Purification: affinity purified by Protein A Concentration: 1mg/ml Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: This gene contains two ankyrin repeat-encoding regions. Ankyrin repeats are tandemly repeated modules of about 33 amino acids described as L-shaped structures consisting of a beta-hairpin and two alpha-helices. Ankyrin repeats occur in a large number of functionally diverse proteins, mainly from eukaryotes, and are known to function as protein-protein interaction domains. Alternative splicing has been observed for this gene but the full-length nature of additional variants has not been determined. [provided by RefSeq, Jul 2008]	Isotype: IgG SWISS: Q9NVP4 Applications: ELISA (1:5000-10000) Reactivity: (predicted: Human, Mouse, Rat, Rabbit, Pig, Sheep, Cow, Dog, Horse) Predicted MW.: 82 kDa Subcellular Location: Extracellular matrix, Cytoplasm, Nucleus
