Rabbit Anti-Chicken IgM

- DATASHEET -

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Target: Rabbit Anti-Chicken IgM
Immunogen: Native Chicken IgM: full length.
Purification: affinity purified by Protein A

Storage: 0.01M PBS (pH7.4).

Store at -20°C stable for 2 years (lyophilized powder). Avoid repeated

freeze/thaw cycles.

Background: IgM normally constitutes about 10% of serum immunoglobulins. IgM

antibody is prominent in early immune responses to most antigens and is largely confined to plasma due to it's large size. Monomeric IgM is expressed as a membrane bound antibody on the surface of B cells and as a pentamer when secreted by plasma cells. Due to it's high valency IgM is more efficient than other isotypes is binding antigens with repeating epitopes (virus particles and red blood cells) and is more efficient than IgG in activiating the complement pathway.

The gene for the mu constant region contains four domains

separated by short intervening sequences.

Applications: Isotype Control

Blocking Assay

etc.

Conjugate-Dependent.

Reactivity: Chicken
