
GNMT Antibody Blocking Peptide

Catalog Number: bs-2396P

Activity: Not tested

Purification: HPLC

Storage: Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.

Background: GNMT catalyzes the methylation of glycine by using S-adenosylmethionine (AdoMet) to form N-methylglycine (sarcosine) with the concomitant production of S-adenosylhomocysteine (AdoHcy). It plays a possible crucial role in the regulation of tissue concentration of AdoMet and of metabolism of methionine.
