AQP3 Antibody Blocking Peptide

Catalog Number:	bs-1253P
Activity:	Not tested
Purification:	HPLC
Storage:	Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.
Background:	This gene encodes the water channel protein aquaporin 3. Aquaporins are a family of small
	integral membrane proteins related to the major intrinsic protein, also known as aquaporin
	0. Aquaporin 3 is localized at the basal lateral membranes of collecting duct cells in the
	kidney. In addition to its water channel function, aquaporin 3 has been found to facilitate
	the transport of nonionic small solutes such as urea and glycerol, but to a smaller degree. It
	has been suggested that water channels can be functionally heterogeneous and possess
	water and solute permeation mechanisms. [provided by RefSeq, Aug 2011]
