

## Recombinant mouse IL2RA protein, C-His (HEK293)

Catalog Number: bs-43544P

Species: Mouse

AA Seq: 22-236/268

Predicted MW: 25.7

Tags: C-His

Activity: Not tested

Endotoxin: Not analyzed

Purity: >90% as determined by SDS-PAGE

Purification: AC

Form: Lyophilized or Liquid

Storage: PBS (pH7.4).

Stored at -70°C or -20°C. Avoid repeated freeze/thaw cycles.

Background: The interleukin 2 (IL2) receptor alpha (IL2RA) and beta (IL2RB) chains, together with the

common gamma chain (IL2RG), constitute the high-affinity IL2 receptor. Homodimeric alpha

chains (IL2RA) result in low-affinity receptor, while homodimeric beta (IL2RB) chains

produce a medium-affinity receptor. Normally an integral-membrane protein, soluble IL2RA

has been isolated and determined to result from extracellular proteolyisis. Alternately-

spliced IL2RA mRNAs have been isolated, but the significance of each is presently unknown.

Mutations in this gene are associated with interleukin 2 receptor alpha deficiency. Patients

with severe Coronavirus Disease 2019 (COVID-19), the disease caused by the novel severe

acute respiratory syndrome coronavirus 2 (SARS-CoV-2), have significantly elevated levels of

IL2R in their plasma. Similarly, serum IL-2R levels are found to be elevated in patients with

different types of carcinomas. Certain IL2RA and IL2RB gene polymorphisms have been

associated with lung cancer risk. [provided by RefSeq, Jul 2020]

## **VALIDATION IMAGES**

The purity of the protein is greater than 90% as determined by reducing SDS-PAGE.
