
Human γ -Globulin

Catalog Number: C5079

AA Seq: Purified native protein

Activity: Yes

Endotoxin: Not analyzed

Purity: $\geq 99\%$ as determined by SDS-PAGE

Storage: Stored at -20°C .

Background: Immunoglobulin G has a molecular weight of approximately 155-160 kDa and is made up of two heavy chains, each of about 55-60 kDa and 2 light chains, each of about 25-28 kDa.
