

Recombinant human ACE2 protein, C-His (HEK293)

Catalog Number: bs-46110P

Concentration: >0.5 mg/ml

AA Seq: 1-740/805

Detected MW: 100-110 kDa

Tags: C-His

Activity: Not tested

Endotoxin: Not analyzed

Purity: >95% as determined by SDS-PAGE

Purification: AC

Form: Lyophilized or Liquid

Storage: Supplied as solution form in PBS (pH7.5)/Supplied as lyophilized from PBS (pH7.5).

Stored at -70°C or -20°C. Avoid repeated freeze/thaw cycles.

Background: The protein encoded by this gene belongs to the angiotensin-converting enzyme family of dipeptidyl carboxydipeptidases and has considerable homology to human angiotensin 1 converting enzyme. This secreted protein catalyzes the cleavage of angiotensin I into angiotensin 1-9, and angiotensin II into the vasodilator angiotensin 1-7. The organ- and cell-specific expression of this gene suggests that it may play a role in the regulation of cardiovascular and renal function, as well as fertility. In addition, the encoded protein is a functional receptor for the spike glycoprotein of the human coronaviruses SARS and HCoV-NL63. [provided by RefSeq, Jul 2008]

VALIDATION IMAGES

The purity of the protein is greater than 90% as determined by reducing SDS-PAGE.
