ACE2 Antibody Blocking Peptide

Catalog Number: bs-1004P

Activity: Not tested

Purification: HPLC

Storage: Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.

Background: The protein encoded by this gene belongs to the angiotensin-converting enzyme family of

dipeptidyl carboxydipeptidases and has considerable homology to human angiotensin 1 converting enzyme. This secreted protein catalyzes the cleavage of angiotensin I into

angiotensin 1-9, and angiotensin II into the vasodilator angiotensin 1-7. The organ- and cell-

specific expression of this gene suggests that it may play a role in the regulation of

cardiovascular and renal function, as well as fertility. In addition, the encoded protein is a functional receptor for the spike glycoprotein of the human coronaviruses SARS and HCoV-

NL63. [provided by RefSeq, Jul 2008]
