## ERK1 + ERK2 Peptide

Catalog Number: bs-0022P

Activity: Not tested

Purification: HPLC

Storage: Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.

Background: The protein encoded by this gene is a member of the MAPkinase family. MAP kinases, also

known as extracellularsignal-regulated kinases (ERKs), act in a signaling cascade

that regulates various cellular processes such as proliferation, differentiation, and cell cycle

progression in response to avariety of extracellular signals. This kinase is activated

byupstream kinases, resulting in its translocation to the nucleuswhere it phosphorylates nuclear targets. Alternatively splicedtranscript variants encoding different protein isoforms

have beendescribed. [provided by RefSeq, Jul 2008].
