phospho-Beta catenin (Tyr142) Antibody Blocking Peptide

Catalog Number:	bs-2063P
Activity:	Not tested
Purification:	HPLC
Storage:	Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.
Background:	The protein encoded by this gene is part of a complex of proteins that constitute adherens
	junctions (AJs). AJs are necessary for the creation and maintenance of epithelial cell layers
	by regulating cell growth and adhesion between cells. The encoded protein also anchors the
	actin cytoskeleton and may be responsible for transmitting the contact inhibition signal that
	causes cells to stop dividing once the epithelial sheet is complete. Finally, this protein binds
	to the product of the APC gene, which is mutated in adenomatous polyposis of the colon.
	Mutations in this gene are a cause of colorectal cancer (CRC), pilomatrixoma (PTR),
	medulloblastoma (MDB), and ovarian cancer. Three transcript variants encoding the same
	protein have been found for this gene.[provided by RefSeq, Oct 2009].
