## **CD133 Antibody Blocking Peptide**

Catalog Number:	bs-0209P
Activity:	Not tested
Purification:	HPLC
Storage:	Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.
Background:	This gene encodes a pentaspan transmembrane glycoprotein. The protein localizes to
	membrane protrusions and is often expressed on adult stem cells, where it is thought to
	function in maintaining stem cell properties by suppressing differentiation. Mutations in this
	gene have been shown to result in retinitis pigmentosa and Stargardt disease. Expression of
	this gene is also associated with several types of cancer. This gene is expressed from at least
	five alternative promoters that are expressed in a tissue-dependent manner. Multiple
	transcript variants encoding different isoforms have been found for this gene. [provided by
	RefSeq, Mar 2009]
