Sudan I/OVA

Catalog Number:	bs-10597PA
Concentration:	1mg/ml
AA Seq:	Coupling protein
Activity:	No
Form:	Liquid
Storage:	0.01M TBS(pH7.4).
	Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.
Background:	Sudan I (also commonly known as CI Solvent Yellow 14 and Solvent Orange R), is an organic
	compound, typically classified as an azo dye. It is an intensely orange-red solid that is added
	to colourise waxes, oils, petrol, solvents, and polishes. Sudan I has also been adopted for
	colouring various foodstuffs, especially curry powder and chili powder, although the use of
	Sudan I in foods is now banned in many countries, because Sudan I, Sudan III, and Sudan IV
	have been classified as category 3 carcinogens (not classifiable as to its carcinogenicity to
	humans) by the International Agency for Research on Cancer. Sudan I is still used in some
	orange-coloured smoke formulations and as a colouring for cotton refuse used in chemistry
	experiments.
