## bs-10938R

## [ Primary Antibody ]

## D3R Rabbit pAb

techsupport@bioss.com.cn

400-901-9800 - DATASHEET -Host: Rabbit Isotype: IgG Applications: WB (1:500-2000) ELISA (1:5000-10000) Clonality: Polyclonal Reactivity: Human GenelD: 8718 SWISS: Q93038 Target: D3R Immunogen: KLH conjugated synthetic peptide derived from human TNFRSF25: Predicted 43 kDa 25-100/417. < Extracellular > MW.: Purification: affinity purified by Protein A Concentration: 1mg/ml Subcellular Location: Secreted ,Cell membrane Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor is expressed preferentially in the tissues enriched in lymphocytes, and it may play a role in regulating lymphocyte homeostasis. This receptor has been shown to stimulate NF-kappa B activity and regulate cell apoptosis. The signal transduction of this receptor is mediated by various death domain containing adaptor proteins. Knockout studies in mice suggested the role of this gene in the removal of self-reactive T cells in the thymus. Multiple alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported, most of which are potentially secreted molecules. The alternative splicing of this gene in B and T cells encounters a programmed change upon T-cell activation, which predominantly produces full-length, membrane bound isoforms, and is thought to be involved in controlling lymphocyte proliferation induced by Tcell activation.
