## **TANGO2 Antibody Blocking Peptide**

Catalog Number: bs-9984P

Activity: Not tested

Purification: HPLC

Storage: Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.

Background: Chromosome 22 contains over 500 genes and about 49 million bases. Being the second

smallest human chromosome, 22 contains a surprising variety of interesting genes. Phelan-

McDermid syndrome, Neurofibromatosis type 2 and autism are associated with

 $chromosome\ 22.\ A\ schizophrenia\ susceptibility\ locus\ has\ been\ identified\ on\ chromosome\ 22$ 

and studies show that 22q11 deletion symptoms include a high incidence of schizophrenia.

Translocations between chromosomes 9 and 22 may lead to the formation of the

Philadelphia Chromosome and the subsequent production of the novel fusion protein, BCR-

Abl, a potent cell proliferation activator found in several types of leukemia. The C22orf25

 $gene\ product\ has\ been\ provisionally\ designated\ C22 or f25\ pending\ further\ characterization.$
