C4orf22 Antibody Blocking Peptide

Catalog Number:	bs-9991P
Activity:	Not tested
Purification:	HPLC
Storage:	Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.
Background:	C4orf22 is a 233 amino acid protein that exists as three alternatively spliced isoforms and are
	encoded by a gene encoding maping to human chromosome 4, which represents
	approximately 6% of the human genome and contains nearly 900 genes. Notably, the
	Huntingtin gene, which is found to encode an expanded glutamine tract in cases of
	Huntington's disease, is on chromosome 4. FGFR-3 is also encoded by a gene that maps to
	chromosome 4 and has been associated with thanatophoric dwarfism, achondroplasia,
	Muenke syndrome and bladder cancer. Chromosome 4 is also tied to Ellis-van Creveld
	syndrome, methylmalonic acidemia and polycystic kidney disease.
