BECN1 Antibody Blocking Peptide

Catalog Number:	bs-33315P
Activity:	Not tested
Purification:	HPLC
Storage:	Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.
Background:	Beclin 1 is the first identified mammalian gene to mediate autophagy and also has tumor
	suppressor and antiviral function. Autophagy, a process of bulk protein degradation through
	an autophagosomic lysosomal pathway, is important for differentiation, survival during
	nutrient deprivation, and normal growth control, and is often defective in tumor cells. Beclin
	1 was originally isolated in a yeast two hybrid screen to identify Bcl 2 binding partners and
	maps to a tumor susceptibility locus on human chromosome 17q21 that is frequently
	monoallelically deleted in human breast, ovarian and prostate cancer. Beclin 1 encodes an
	evolutionarily conserved 52kDa coiled coil protein that is expressed in human muscle,
	epithelial cells and neurons.
