Recombinant human EGF protein, N-His

Catalog Number:	bs-10804P
Concentration:	>0.5 mg/ml
AA Seq:	971-1023/1207
Predicted MW:	5.8
Detected MW:	12 kDa
Tags:	N-His
Activity:	Not tested
Endotoxin:	Not analyzed
Purity:	>95% as determined by SDS-PAGE
Purification:	AC
Form:	Lyophilized or Liquid
Storage:	20mM Tris-HCl (pH8.0) with 8M Urea.
	Stored at -70°C or -20°C. Avoid repeated freeze/thaw cycles.
Background:	Epidermal growth factor (EGF) is an acid- and heat-stable 53 amino acid protein originally
	found in rodents and humans. It has been shown to be a potent mitogen for a variety of cell
	types both in vivo and in vitro. EGF binds to the EGF receptor on the surface of cells and
	mediates intrinsic phosphorylation of the receptor on tyrosine residues. It has been
	detected in nearly all body fluids, such as urine (urogastrone), saliva, milk and platelet-rich
	plasma. EGF, TGF?and vaccinia virus growth factor exhibit 30-40% amino acid homology.
	Several additional members of the EGF/TGF family have been described; these include
	Cripto, Amphiregulin and the heparin-binding EGF-like growth factor. Amphiregulin and the
	heparin-binding EGF-like growth factor both bind to the EGF receptor.

VALIDATION IMAGES

The purity of the protein is greater than 56% as determined by reducing SDS-PAGE.
