## Recombinant mouse EMP-1 protein, GST & His

Catalog Number:	bs-41343P
Concentration:	>0.5 mg/ml
Species:	Mouse
AA Seq:	16-64/160
Predicted MW:	32
Detected MW:	32 kDa
Tags:	GST & His
Activity:	Not tested
Endotoxin:	Not analyzed
Purity:	>95% as determined by SDS-PAGE
Purification:	AC
Form:	Lyophilized or Liquid
Storage:	4M Urea (pH9.0).
	Stored at -70°C or -20°C. Avoid repeated freeze/thaw cycles.
Background:	Epithelial membrane protein-1 (EMP-1) is a four pass transmembrane protein consisting of
	160 amino acids. It is a member of a small family of epithelial membrane proteins. EMP-1 is
	very similar in structure to its close relative, Peripheral Myelin Protein 22 (PMP22). It is most
	predominantly expressed in tissues of the gastrointestinal tract but has also been found to
	be a junctional protein in the liver expressed along the intercellular border. EMP-1 directly
	interacts with the C-terminus of the P2X7 receptor and may be involved in membrane
	blebbing. EMP-1 may also be an important regulator in cell communication, signaling, and
	adhesion. When EMP-1 is overexpressed, cell proliferation is inhibited, S phase is arrested
	and G1 phase is prolonged in esophogeal cancer cells. EMP-1 may play a role in
	tumorigenesis and has been identified as a biomarker for gefitinib treatment resistance for
	patients with lung cancer.

## VALIDATION IMAGES

The purity of the protein is greater than 90% as

10

determined by reducing SDS-PAGE.
