
RNF192 Antibody Blocking Peptide

Catalog Number: bs-18338P

Activity: Not tested

Purification: HPLC

Storage: Shipped at 4°C. Stored at -20°C for one year. Avoid repeated freeze/thaw cycles.

Background: The RING-type zinc finger motif is present in a number of viral and eukaryotic proteins and is made of a conserved cysteine-rich domain that is able to bind two zinc atoms. Proteins that contain this conserved domain are generally involved in the ubiquitination pathway of protein degradation. LONRF2 is a 754 amino acid protein containing one LON domain, one RING-type zinc finger and six TPR repeats. Two isoforms of LONRF2 are produced by alternative splicing events. The gene encoding LONRF2 maps to human chromosome 2q11.2 and mouse chromosome 1 B.
