Mink IgG / RBITC

| Catalog Number: | bsR-0777P |
|-----------------|---|
| Form: | Liquid |
| Applications: | Isotype Control, Blocking Assay, etc., Conjugate-Dependent. |
| Storage: | 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% glycerol. |
| | Store at -20°C for one year. Avoid repeated freeze/thaw cycles. |
| Background: | Immunoglobulin G (IgG), is one of the most abundant proteins in serum with normal levels |
| | between 8-17 mg/mL in adult blood. IgG is important for our defence against |
| | microorganisms and the molecules are produced by B lymphocytes as a part of our adaptive |
| | immune response. The IgG molecule has two separate functions; to bind to the pathogen |
| | that elicited the response and to recruit other cells and molecules to destroy the antigen. |
| | The variability of the IgG pool is generated by somatic recombination and the number of |
| | specificities in an individual at a given time point is estimated to be 1011 variants. |
