Mouse IgM / RBITC

| Catalog Number: | bsR-0368P |
|-----------------|--|
| Form: | Liquid |
| Applications: | Isotype Control, Blocking Assay, etc., Conjugate-Dependent. |
| Storage: | 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% glycerol. |
| | Store at -20°C for one year. Avoid repeated freeze/thaw cycles. |
| Background: | IgM normally constitutes about 10% of serum immunoglobulins. IgM antibody is prominent |
| | in early immune responses to most antigens and is largely confined to plasma due to it's |
| | large size. Monomeric IgM is expressed as a membrane bound antibody on the surface of B |
| | cells and as a pentamer when secreted by plasma cells. Due to it's high valency IgM is more |
| | efficient than other isotypes is binding antigens with repeating epitopes (virus particles and |
| | red blood cells) and is more efficient than IgG in activiating the complement pathway. The |
| | gene for the mu constant region contains four domains separated by short intervening |
| | sequences. |
