[Primary Antibody]

SLC22A6 Rabbit pAb

www.bioss.com.cn sales@bioss.com.cn techsupport@bioss.com.cn 400-901-9800

– DATASHEET –––––		400-901-9800
Host: Rabbit	lsotype: IgG	Applications: IHC-P (1:100-500)
Clonality: Polyclonal		IHC-F (1:100-500) IF (1:100-500)
GenelD: 9356	SWISS: Q4U2R8	ICC/IF (1:100-500)
Target: SLC22A6		ELISA (1:5000-10000)
Immunogen: KLH conjugated synthetic peptide derived from human SLC22A6: 31-130/563. < Extracellular >		A6: Reactivity: Human (predicted: Rat)
Purification: affinity purified by	Protein A	
Concentration: 1mg/ml		Predicted
Storage: Preservative: 0.02% Proclin300, Constituents: 1% BSA, 0.01M PBS, pH7.4. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.		PBS, Predicted _{62 kDa} MW.: ^{62 kDa} Subcellular Location: Cell membrane
Background: Recent advances in molecular biology have identified three organic anion transporter families: the organic anion transporter (OAT) family encoded by SLC22A, the organic anion transporting peptide (OATP) family encoded by SLC21A (SLCO), and the multidrug resistance-associated protein (MRP) family encoded by ABCC. These families play critical roles in the transepithelial transport of organic anions in the kidneys as well as in other tissues such as the liver and brain. Among these families, the OAT family plays the central role in renal organic anion transport. Knowledge of these three families at the molecular level, such as substrate selectivity, tissue distribution, and gene localization, is rapidly increasing.) otide t of s the e esse vity,
