— DATASHEET —

Host: Rabbit	Isotype: IgG	Applications: WB (1:1000-2000) IHC-P (1:100-200) IHC-F (1:100-200) IF (1:100-200) Reactivity: Human, Mouse, Rat Predicted MW.: 14 kDa Subcellular Location: Nucleus
Clonality: Recombinant	CloneNo.: 6G9	
GeneID: 3012	SWISS: P04908	
Target: Hydroxyl-Histone H2A (Y39)		
Immunogen: A synthesized peptide derived from human Histone H2A around the hydroxylation site of Y39: GN-Y(OH)-SE.		
Purification: affinity purified by Protein A		
Storage: 10mM phosphate buffered saline(pH 7.4) with 150mM sodium chloride, 0.05% BSA, 0.02% Proclin300 and 50% glycerol. Store at 4°C for short term. Store at -20°C for long term. Avoid repeated freeze/thaw cycles.		
Background: Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability.
