
KS370G

产品编号: D56033

CAS: 105955-01-9

分子式: C₁₇H₁₇NO₃

纯度: 99.51%

InChi Key: InChIKey=QOWABIXYAFJMQE-UHFFFAOYSA-N

Smiles: O=C(C=CC1=CC=C(O)C(O)=C1)NCCC=2C=CC=CC2

外观: 固体粉末

作用通路: Others

作用靶点: Others

保存条件: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

产品介绍: KS370G inhibits UUO-induced renal fibrosis marker expression. KS370G is an orally active hypoglycemic and cardioprotective agent that reduces collagen deposition in obstructed kidneys and significantly decreases renal expression of inflammatory chemokines/adhesion molecules and monocyte markers and improves left ventricular hypertrophy and function in the heart of pressure-overloaded mice. KS370G can be used to study renal obstructive nephropathy.
