
DL-2-Hydroxycaproic acid

产品编号: D60192

CAS: 6064-63-7

分子式: C₆H₁₂O₃

纯度: 98%

InChi Key: InChIKey=NYHNVHGFPZAZGA-UHFFFAOYSA-N

Smiles: CCCCC(O)C(O)=O

外观: 固体粉末

作用通路: Metabolism

作用靶点: Endogenous Metabolite

溶解性: Soluble in DMSO

保存条件: RT

产品介绍: 2-Hydroxycaproic acid is a branched-chain alpha-keto acid that has been reported in normal human blood and in normal amniotic fluid. It has been found that 2-Hydroxycaproic acid is the most significant metabolite found in the CSF of patients infected with Nocardia.
