Recombinant Human IL-4 Protein, N-mFc

Catalog Number:	bs-105639P
Species:	Human
AA Seq:	25-153/153
Predicted MW:	43.54 kDa
Tags:	N-mFc
Activity:	Not tested
Purity:	>90% as determined by SDS-PAGE.
Purification:	AC
Form:	Lyophilized
Storage:	Lyophilized from a solution in PBS pH 7.4, 1mM EDTA, 4% Trehalose, 1% Mannitol.
	Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8°C for one
	week. Store at -20 to -80°C for twelve months from the date of receipt.
Background:	The protein encoded by this gene is a pleiotropic cytokine produced by activated T cells.
	This cytokine is a ligand for interleukin 4 receptor. The interleukin 4 receptor also binds to
	IL13, which may contribute to many overlapping functions of this cytokine and IL13. STAT6,
	a signal transducer and activator of transcription, has been shown to play a central role in
	mediating the immune regulatory signal of this cytokine. This gene, IL3, IL5, IL13, and CSF2
	form a cytokine gene cluster on chromosome 5q, with this gene particularly close to IL13.
	This gene, IL13 and IL5 are found to be regulated coordinately by several long-range
	regulatory elements in an over 120 kilobase range on the chromosome. Two alternatively
	spliced transcript variants of this gene encoding distinct isoforms have been reported.
