	frequent use. Store at -20 to -80°C for twelve months from the date of receipt.
	Binds galactosides. May play a role in thymocyte-epithelial interactions relevant to the
	biology of the thymus. Is a ligand for HAVCR2/TIM3. Induces T-helper type 1 lymphocyte
	(Th1) death (By similarity). May provide the molecular basis for urate flux across cell
	membranes, allowing urate that is formed during purine metabolism to efflux from cells and
	serving as an electrogenic transporter that plays an important role in renal and
	gastrointestinal urate excretion. Highly selective to the anion urate.
