Recombinant Human GSTT2 Protein, N-His

Catalog Number:	bs-105737P
Species:	Human
AA Seq:	15-235/244
Predicted MW:	27.22 kDa
Tags:	N-His
Purity:	>90% as determined by SDS-PAGE.
Purification:	AC
Form:	Lyophilized
Storage:	Lyophilized from a solution in PBS pH 7.4, 0.02% NLS, 1mM EDTA, 4% Trehalose, 1%
	Mannitol.
	Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8° C for
	frequent use. Store at -20 to -80°C for twelve months from the date of receipt.
Background:	Glutathione (GSH) is a tripeptide antioxidant which reduces disulfide bonds between
	cytoplasmic proteins. The constitutive enzyme glutathione reductase transforms
	glutathione into its reduced state which ultimately can provide a measure of cellular
	toxicity. GSTT2 (glutathione S-transferase theta-2), also known as GST class-theta-2, is a 244
	amino acid enzyme with sulfatase activity that functions in conjugating reduced glutathione
	to hydrophobic electrophiles. GSTT2 exists as a homodimer in the cytoplasm and is
	expressed in low levels in the liver and the lung. GSTT2 belongs to the GST superfamily and
	contains both a GST C-terminal and a GST N-terminal domain. The gene encoding GSTT2
	exists on human chromosome 22.
