## **Recombinant mouse CSPG4 Protein, N-His**

Catalog Number:	bs-42517P
Concentration:	>1mg/ml
Species:	Mouse
AA Seq:	2252-2327/2327
Predicted MW:	36.4 kDa
Tags:	N-His
Endotoxin:	Not analyzed
Purity:	>90% as determined by SDS-PAGE
Purification:	AC
Form:	Liquid
Storage:	50mM Tris-Hcl (pH=9.0) with 10mM UGSH
Background:	Proteoglycans (PGs) are a family of proteins composed of different polypeptide chains
	containing glycosaminoglycan (GAG) modifications. They vary in their cellular locations and
	have diverse structure and functions. NG2 is a proteoglycan found in the nervous system,
	comprising a large integral membrane PG with a core protein of 300 kDa and at least one
	covalently attached chondroitin sulfate (CS) GAG chain. In the CNS this protein is expressed
	mainly on the surfaces of developing and adult oligodendrocyte precursor cells, but is also
	associated with developing chondrocytes, cardiomyocytes, pericytes and several human
	tumours. NG2 also stimulates alpha-4, beta-1 integrin-mediated adhesion and spreading by
	recruiting and activating a signaling cascade through CDC42, ACK1 and BCAR1. May activate
	FAK and ERK1/ERK2 signaling cascades.

## VALIDATION IMAGES

The purity of the protein is greater than 90% as determined by reducing SDS-PAGE.
