— DATASHEET —

<p>Host: Rabbit</p> <p>Clonality: Polyclonal</p> <p>GeneID: 7700</p> <p>Target: ZNF141</p> <p>Immunogen: KLH conjugated synthetic peptide derived from human ZNF141: 151-250/471.</p> <p>Purification: affinity purified by Protein A</p> <p>Concentration: 1mg/ml</p> <p>Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.</p> <p>Background: A zinc finger encoding cDNA (ZNF141) of the C2-H2/KRAB subfamily has been mapped to the 4p- (Wolf-Hirschhorn) syndrome (WHS) chromosome region. Zinc finger encoding genes would be good candidates for being involved in the multiple developmental defects associated with chromosomal aneuploidy--because of their role as transcriptional regulators, their abundance in the genome and their known association with specific developmental disorders.</p>	<p>Isotype: IgG</p> <p>SWISS: Q15928</p>	<p>Applications: WB (1:500-2000) IHC-P (1:100-500) IHC-F (1:100-500) IF (1:100-500) ICC/IF (1:100-500)</p> <p>Reactivity: (predicted: Human)</p> <p>Predicted MW.: 55 kDa</p> <p>Subcellular Location: Nucleus</p>
