

Recombinant human CD93 protein, C-His (HEK293)

Catalog Number: bs-43767P

Concentration: >0.5mg/ml

Species: Human

AA Seq: 24-580/652

Predicted MW: 60

Tags: C-His

Endotoxin: Not analyzed

Purity: $\geq 80\%$ as determined by SDS-PAGE.

Purification: AC

Form: Liquid

Storage: PBS (pH=7.4)

Stored at -70°C or -20°C. Avoid repeated freeze/thaw cycles

Background: The protein encoded by this gene is a cell-surface glycoprotein and type I membrane protein that was originally identified as a myeloid cell-specific marker. The encoded protein was once thought to be a receptor for C1q, but now is thought to instead be involved in intercellular adhesion and in the clearance of apoptotic cells. The intracellular cytoplasmic tail of this protein has been found to interact with moesin, a protein known to play a role in linking transmembrane proteins to the cytoskeleton and in the remodelling of the cytoskeleton. [provided by RefSeq, Jul 2008].

VALIDATION IMAGES

The purity of the protein is greater than 80% as determined by reducing SDS-PAGE.
