— DATASHEET —

Host: Rabbit Clonality: Polyclonal GeneID: 51294 Target: PCDH12 Immunogen: KLH conjugated synthetic peptide derived from human PCDH12: 401-500/1184. Purification: affinity purified by Protein A Concentration: 1mg/ml Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: This gene belongs to the protocadherin gene family, a subfamily of the cadherin superfamily. The encoded protein consists of an extracellular domain containing 6 cadherin repeats, a transmembrane domain and a cytoplasmic tail that differs from those of the classical cadherins. The gene localizes to the region on chromosome 5 where the protocadherin gene clusters reside. The exon organization of this transcript is similar to that of the gene cluster transcripts, notably the first large exon, but no significant sequence homology exists. The function of this cellular adhesion protein is undetermined but mouse protocadherin 12 does not bind catenins and appears to have no affect on cell migration or growth.	Isotype: IgG SWISS: Q9NPG4 Applications: WB (1:500-2000) Flow-Cyt (1µg/Test) Reactivity: Mouse (predicted: Human, Rat, Sheep, Cow, Horse) Predicted MW.: 126 kDa Subcellular Location: Cell membrane
