— DATASHEET —

Host: Rabbit Clonality: Polyclonal GeneID: 9210 Target: BMP15 Immunogen: KLH conjugated synthetic peptide derived from human BMP15: 321-392/392. Purification: affinity purified by Protein A Concentration: 1mg/ml Storage: 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles. Background: The BMP15 protein is a member of the bone morphogenetic protein family which is part of the transforming growth factor beta superfamily. The transforming growth factor beta superfamily includes large families of growth and differentiation factors. It is thought that BMP15 may be involved in oocyte maturation and follicular development as a homodimer, or by forming heterodimers with a related protein, Gdf9.	Isotype: IgG SWISS: O95972	Applications: WB (1:500-2000) Reactivity: Human (predicted: Mouse, Rat, Rabbit, Pig, Sheep, Cow, Chicken, Horse) Predicted MW.: 14 kDa Subcellular Location: Secreted

— VALIDATION IMAGES —

Sample: A549(Human) Cell Lysate at 40 ug
Primary: Anti-BMP15 (bs-6612R) at 1/300 dilution
Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution Predicted band size: 14 kD
Observed band size: 14 kD
